

DESALEW ALGANAH

Computer Engineer & Data Specialist

CONTACT

- +251 962 622 111
- desu6262@gmail.com
- linkedin.com/in/Desalew-Aleganeh
- Addis Ababa, Ethiopia

SKILLS

Programming (Python/C++/C)

Embedded Systems

Circuit Design & Analysis

Microcontrollers (Arduino, ARM)

Computer Hardware Maintenance

Web Development

Database Systems

Data Analysis

LANGUAGES

Amharic (Native)

English (Fluent)

Agewagna (Native)

Afan Oromo (Good)

HOBBIES

- Electronics Projects
- Programming Challenges
- Technical Blogging
- Open Source Contributions
- Circuit Design
- Teaching STEM

PROFILE

Computer Engineering graduate with distinction (CGPA: 3.36) specializing in software development, embedded systems, and system analysis. Experienced in data collection, IT infrastructure, and building practical solutions like AI chatbots and management systems. Passionate about bridging hardware and software solutions.

EXPERIENCE

Data Collector

Komery Beverage

2025 - Present

- Collect and analyze sales/distribution data to optimize operations
- Develop automated data collection scripts using Python
- Ensure data accuracy and generate reports for management

ICT Intern

Hawassa University

2023 (4 months)

- Maintained IT infrastructure and resolved technical issues
- Assisted in system upgrades and network troubleshooting
- Provided hardware maintenance for computer labs

EDUCATION

BSc in Electrical Engineering (Computer Engineering)

Hawassa University

2019 - 2025

- Graduated with Distinction (CGPA: 3.36)
- Thesis: "Patient Management System" (Grade: A+)
- Key Courses: Embedded Systems, Digital Signal Processing, Computer Architecture

PROJECTS

AI-Powered Chatbot for Local Businesses

2025

- Built with Python/Flask for Ethiopian businesses
- Implemented NLP features for local language support
- Increased user engagement by 30% with intuitive UI

Patient Management System (Thesis)

2025

- Full-stack healthcare solution with MySQL backend
- Reduced administrative time by 40% through automation
- Implemented secure patient data handling

Smart Home Automation System

2024

- Designed IoT-based system using Arduino and Raspberry Pi
- Implemented remote control via mobile app
- Reduced energy consumption by 25% in prototype
